

ALUMINUM COLUMNS

Columns are load bearing with no wood or additional reinforcement required.

They come in 4 pieces and can be assembled around existing posts.

Top & bottom mounting plates and trim allow easy installation.

BUILT TO LAST A LIFETIME

Al-Mar's Aluminum Railings and Columns are designed to last a lifetime. We are partnering with M.C.M.E.L., a leading Canadian manufacturer of these products. We are fabricating the railings at our facility in Exeter Ontario.

Al-Mar has been a leading fabricator of VINYL RAILINGS AND FENCING for 20 years. We are now branching out and adding ALUMINUM to our line. Aluminum allows for the use of darker colours and smaller profiles that help us meet the current trends in home design.

Al-Mar is constantly expanding our product line to maintain our position as a leader in the industry. Through our vast dealer network of Building Supply Stores, Distributors, and Home Improvement Contractors, Al-Mar has achieved unparalleled levels of service and product awareness in the region.
