AV HYBRID FENCE

IT'S ALL IN THE NAME

AV - Aluminum and Vinyl - A mixed material fencing lineup that is low maintenance with maximum aesthetic appeal. Allowing for rich colour options in a unique horizontal design, our AV Hybrid is redesigned and better than ever.

Create a modern, upscale aesthetic that reflects your own personal style.

Infill pickets are available in both **PVC and WPC**, offering two distinct board styles and seven different colour options. These contemporary fence panels offer complete customization and feature an aluminum frame with a satin black finish. Aluminum is impervious to the elements and unlike many of our competitors who use steel, it will not corrode or rust. With aluminum, this is a fence that will stand the test of time.

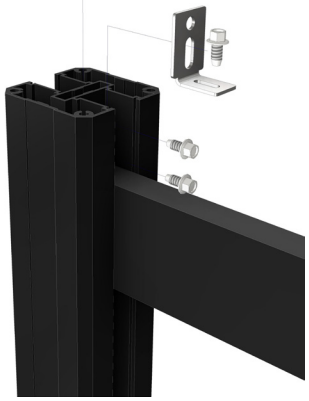
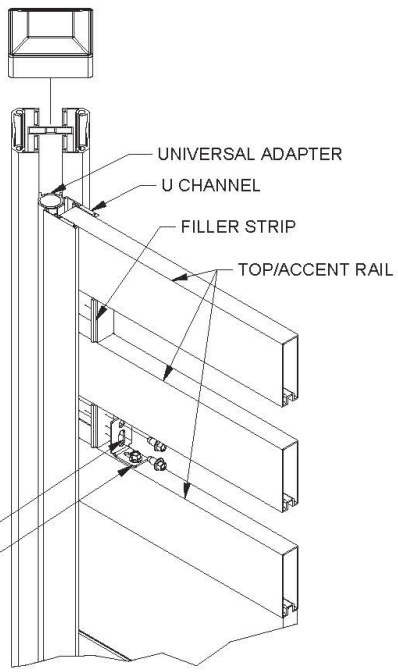
AV HYBRID FENCE

Al-Mar's AV Hybrid uses **9ft and 11ft post lengths** to work with varying fence heights. **Surface mount** posts are also available, letting you choose whether to install a traditional fence that encloses an outdoor area or to install fence panels on an existing hard surface, like a patio, for additional privacy. Lastly, **universal angle adaptors** allow fence installation at any angle without using two posts at the corner.

KEY COMPONENTS

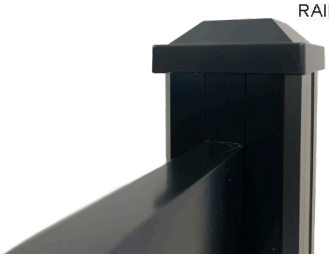


CLIP CONNECTION



UNIVERSAL CORNER

Shown with a Double Accent



FILLER STRIP

With a filler strip installed, all clips and fasteners are hidden.
